EDUCATION

University of Rochester

Rochester, New York

BS in Data Science, BA in Financial Economics

May 2027

- **GPA:** 4.0/4.0 (Dean's List)
- **Coursework:** Predictive Analytics, Machine Learning, Statistics, Database Systems, Data Mining, Time Series Analysis, Artificial Intelligence, Tools for Data Science, Linear Algebra, Game Theory
- **Leadership:** Teaching Assistant (Intro to Statistics, Intro to Computer Science), Event Manager (Vietnamese Students Association), Study Group Leader (Calculus I, Intermediate Economics)

PROFESSIONAL EXPERIENCE

iZone | *University of Rochester's biggest innovation hub*

Rochester, New York

Data Analyst

Aug 2025 - Present

- Define 6 engagement KPIs in collaboration with Consulting team and built source attribution to identify top channels, delivering 50% more project signups and 23% more outreach
- Executed an A/B test on the discussion card game's impact by pairing survey feedback with occupancy metrics, applying seasonal adjustments, and quantified a 10% engagement lift
- Designed a Python-based occupancy forecasting pipeline with statsmodels and Meta Prophet that pinpointed 10 high-traffic days and 4 peak slots for event planning

MCredit | *The largest consumer lending firm in Vietnam*

Hanoi, Vietnam

Data Analyst Intern

Jun 2025 - Aug 2025

- Led a cross-team project with HR, Finance, and Marketing to define performance-based incentive logic and deploy an automated commission tool for 400+ salespeople using Python, SQL, and Tableau, reducing processing time by 70%
- Built clustering models to segment 58K+ customers to 5 groups, identified the highest-value segment profile and targeted lookalike customers with 3 tailored cross-selling strategies, boosting conversion rates by 17%
- Developed and deployed an LSTM model to forecast net profit margin from 12 months of financial data, improving prediction accuracy by 15% over baseline and strengthening risk and repayment analysis

MB Bank | *The 3rd largest commercial bank in Vietnam*

Hanoi, Vietnam

Data Analyst Intern

Jun 2024 - Jul 2024

- Facilitated a cross-functional alignment to define 12 operational metrics capturing enterprise-level financial health, and developed 4 real-time dashboards for third-level executives, enabling timely identification of emerging issues
- Built a Tableau reporting system to track financial liquidity across 284 branches in 53 provinces, empowering finance teams to forecast 3-month cash flow needs and improve capital efficiency
- Mitigated \$50K in risk exposure for 1K+ overdue assets by formulating a list of 7 risk indicators from 70K+ insurance data using SQL and Python, enhancing compliance checks and asset tracking

PROJECTS

Data Analytics: E-Wallet User Retention Analysis | SQL, Python

[\[Github\]](#)

- Executed Python-based cohort analysis to uncover early dropout trends, preventing a 70% usage decline in 3 months
- Minimized cashback expenses by 20% while sustaining retention via targeted up-selling and personalized discounts

Data Visualization: Bank Operations Dashboard | Power BI, Power Query, DAX

[\[Github\]](#)

- Improved data accuracy by 25% across 100K+ banking records using Power Query for efficient cleansing and integration
- Refined customer segmentation by analyzing product combinations with DAX and recommending credit cross-selling

Machine Learning: Credit Classification | Numpy, Scikit-learn (XGBoost), Tensorflow (Keras), SciPy

[\[Github\]](#)

- Streamlined feature selection on 100K+ credit records using F-tests and Chi-squared tests, reducing features by 40%
- Enhanced poor credit applicant detection with 0.74 recall and 0.76 precision through hyperparameter tuning

SKILLS

Tools: Programming Languages: Python (Pandas, Numpy, Scikit-learn), SQL, R; Data Visualization: Tableau, Power BI, Excel; Cloud: AWS (S3, Bedrock, Glue, Redshift), Azure; Big Data Technology: Hadoop, Spark

Skills: Statistical Data Analysis, Predictive Modeling, Regression Analysis, A/B Testing, Machine Learning (Clustering, Classification, Prediction), Time Series Analysis, Deep Learning, NLP, Data Cleaning, Database Design
